Henry,

LBT status update provided below; the team we assimilated is up and running with a significant degree of cross-organizational coordination and communication within their areas of expertise. In particular, Flaire Mills (R2 ORC) has been invaluable to our team effort. Please advise if you have any questions or would like an in-person brief.

Thanks, Rob

Henry,

My first recurring weekly status update is provided below. I will aim for Fridays, unless you or Andrew have a preference/need for a different frequency and/or different point in the week. I will also end each update with a proposed summary that you can forward to AW at your discretion so that he is prepared to respond quickly to a no-notice inquiry. I'll keep future updates shorter (3-4 bulleted highlights or so), but please advise if you'd prefer a format other than what I have provided today. There is also a lot of detail behind each piece, so we are prepared to brief you in person with little notice if you'd like a deeper dive or have questions at any point. R2, OECA and OAR staff have invested a significant amount of time digging into the details; which certainly made getting up to speed much easier. I've copied Bill, Patrick, David, and Pete out of courtesy and appreciation....which I'd ask make it back down to their staff (and if any of you would like to be dropped from future updates, please let me know offline).

I've also attached R2's more recent issue paper/fact sheet for reference.

Thanks, Rob

Pete:

Acting Administrator Wheeler and I have asked the Office of Policy to engage their Office of Federal Activities to lead in the coordination of the Limetree matter. The Director, Rob Tomiak, has agreed to serve as EPA's project manager who will be the primary point of contact for Limetree in helping to connect them with the federal programs and offices they must involve to resume operations. Please inform your team to fully cooperate with Rob in these efforts.

If you have any questions, please let me know.

Thank you.
